Z1 – Sky-therm®

with wavy cut

- Wavy cut protects problem areas of the body
- Excellent point elasticity due to lattice of the Sky-therm® layer

Z2 – Soft-therm

with fine perforations

- Highly elastic soft-therm layer
- Fine perforations enhance the flexibility and improve the microclimate

TEMPUR-MED®

PRESSURE REDISTRIBUTING MATTRESSES AND PILLOWS

Premium mattress

- Outstanding pressure ulcer prevention validated in trials
- Reacts to body weight and temperature

P1, P2 – Prevention mattresses

Protection against decubitus

- Strong visco-foam layer ensures relieving pressure distribution
- Edge zone reinforcement for greater protection and mobility

C1 – Comfort mattress

Great reclining properties

- „Sandwich cushion“ made of visco and cold foam with good microclimate

S1 – Heavyweight mattress

For high requirements

- 3-layer mattress for heavier users

Alternating pressure systems for clinical use

- Systems for different requirements
- Durable PU membranes
- Acoustic signal functions
- Control units with robust housings and retaining brackets

International Edition

ESSENTIALLY BETTER

STIEGELMEYER

High quality medical products from Stiegmeyer

Beds and furniture for use in hospitals must cover a great spectrum of requirements. Safety in everyday use is the key consideration. Outstanding hygiene properties are important to win the battle against drug-resistant superbug infections. Patients' recovery should be supported through high comfort. Nursing staff rely on easy ergonomic bed controls.

Stiegmeyer has been successfully working to meet these requirements for many decades and to provide value for money products. The family firm from Herford has long been a pioneer of many core areas of bed development, and still is today. The design department can look back on more than forty years' experience with machine washable hospital beds.

The Stiegmeyer catalogue contains beds for both special mobilisation or intensive care requirements as well as models offering an entire modular system for customisable configurations. This makes it possible to meet the individual needs of every institution down to the last detail. The quality of Stiegmeyer is characterised by lifelong support and 15 years spare part availability. Further service offers can be requested from our local partners.

Hospital beds from Stiegmeyer introduce a new feeling of well-being into the daily routine of hospital units.
