HOMELIKE ELEGANCE FOR THE LIBRA AND LIBRA PARTNER COMFORT BEDS

Bring an extra touch of elegance into your bedroom with upholstered bed surrounds for our Libra and Libra partner comfort beds. The head and footboards of our Nobla design line look even cosier with elegant quilting.

Two patterns are available: The **box design** with rectangular lines looks modern and radiates new energy. The **diamond design** is both elegant and cosy. The colour selection of the Stieglmeyer fabric collection allows both patterns to shine according to individual taste. With the help of the Vario Safe system, headboards, footboards and panels can be replaced at any time without tools.

## Box design

Nobla – the high head and footboard for opulent cosiness.

Nobla reha – the head and footboard for a warm feeling of safety.

Nobla mala – the elegant low head and footboard.

## Diamond design

---

# FABRICS AND IMITATION LEATHER

---

A variety of **homelike fabrics and imitation leathers** are available for both the quilted and the normal upholstered head and footboards of the Nobla series. Use radiant colours, warm natural shades or noble grey to create the atmosphere of your bedroom according to your ideas.

All upholstery is **easy to care for**. Liquid and viscous substances do not penetrate the fabric. They can be removed quickly and thoroughly with a brush, water and cleaning agents.

# THE VARIO SAFE SYSTEM

---

With the Vario Safe system from Stieglmeyer, you can design your comfort bed **flexibly**. Head and footboards, side panels and safety sides can be **attached and removed** in just a few moments **without tools**. This is made possible by patented snap locks. So you can exchange upholstered and quilted headboards for wood decor headboards or head and footboards in a different fabric colour whenever you feel like it. Equally variable is the use of the split safety sides for more protection and orientation at night.
