

ESSENTIALLY BETTER

# Evario select

The ward bed for medical care

The Evario select is a model variant that enables good patient care at all times while focusing on the essential tasks in everyday hospital life. It is designed for safety, ease of use and the best possible support for the patient.

- Split safety side Protega with safe one-hand operation
- Integrated control panels unite the important functions for patients and nursing staff at a glance
- Safe working load of 225 kg
- Height adjustment range from 36 up to 84 cm depending on the type of castor
- Planar design for thorough manual reprocessing
- Attractive modern appearance with the 3 available head and footboard designs Intercontinental, Stelo and Rondo

STIEGELMEYERGROUP

▲ The control panels each have a simply designed user surface for the patient facing inwards.

## Evario select

### Safety and easy operation

The split safety side Protega allows either full-length protection or comfortable room for unhindered entry and exit. The Evario select is operated with panels integrated into the safety sides, with the options reduced to the most frequently used bed functions.

#### Advantages

- Protega safety side offers protection and promotes patient mobility at the same time
- Integrated panels with user surfaces located on the inner and outer sides enable simple and intuitive adjustment of the mattress base
- Nursing staff can trigger the CPR and Trendelenburg positions on the outer panels
- Optional control box for adjusting the bed from the foot end

▲ The series-standard control panels are located on both sides of the bed integrated into the Protega safety side.

▲ The castors' central locking mechanism can be quickly activated or released with easily accessible brake pedals.

▲ Its planar design and the clear chassis ensure excellent hygiene properties.

## Evario select

### Comfort and relief

Comfort for patients and relief for nursing staff are the strengths of the Evario select. Its height adjustment range from 36 up to 84 cm is ideal for a comfortable entry and exit as well as ergonomic work by the bed. The head-side elements of the Protega safety sides move along with the many health-promoting adjustment options of the mattress base and offer optimum protection. Tall patients benefit from the integrated bed extension.

Manoeuvring in confined spaces or a good straight line in long corridors are possible without any problems thanks to the robust 125 or 150 millimetre castors. An optional 5<sup>th</sup> castor further improves the handling characteristics. Colour-coded brake pedals facilitate the use of the castors' central locking mechanism.

▲ The integrated bed extension can be pulled out without tools.

◀ The Protega safety side can be easily operated with just one hand.

▲ The optional linen holder offers a storage space while making the bed.
