Bedside cabinets
Homelike design and flexibility
Combino

The all-rounder

The Combino brings together all of the service functions of a modern bedside cabinet with easy operation. It is distinguished by its sturdy stability and a timelessly stylish design. The rounded corner profiles give it a particularly comfy feeling.

Combino is available with or without a side overbed table. A compartment or roller-guided drawers in various sizes provide the required storage space, and may be selected and arranged as needed. The Combino allows drawers to be arranged in a variety of ways which makes it particularly flexible. This means that residents can easily reach all the belongings they need in daily life. Instead of the two lower drawers, a built-in fridge may be installed.

The practical details that the Combino affords add up to greater convenience in every day use. Besides a slide-out table that locks into place, these include adapter sleeves for a telephone or intercom system. A reading lamp ensures good orientation at night. The multifunctional rail, fitted as standard, offers a place for accessories or can be used as a towel holder.

ESSENTIALLY BETTER

Three versions

- Standard: one compartment in the middle and a large drawer at the bottom
- Version 1: two normal drawers at the top and one large drawer at the bottom
- Version 2: one large drawer in the middle and a normal drawer at the top and the bottom

The overbed table

Flexible use with Combino

The Combino affords particular comfort with its stable and flexible overbed table. This can be easily attached and detached - on either side. This means that the Combino can be placed on either the left-hand or right-hand side of the care bed and fits in with any existing furniture and room layout.

The pivoting table top of the overbed table provides a safe place to place cups and plates and any personal belongings. It is also suitable as a reading table.
Cosimo
The comfortable option

The Cosimo combines all aspects of comfort to provide a bedside cabinet that enhances the life of both residents and care staff. This starts with the **firmly integrated overbed table** that can be infinitely adjusted from 72 cm to a height of 107 cm. Adjustments are made with the aid of **power assistance**. The pivoting overbed table top is ideal as a surface for reading and writing.

Drawers of different sizes and the compartment of the Cosimo can be arranged as you wish and offer a **flexibility bonus** in the care routine. The back of the cabinet always remains securely closed.

The **slide-out table** that locks into place provides a useful surface in addition to the overbed table and the top surface of the cabinet with its homelike rounded edges. In place of the large drawer, it is also possible to incorporate a fridge. Even more comfort in everyday life is provided by the **multifunctional rail**, which is included as standard. This can be used as a towel holder if required and it also provides room for a practical clip-on reading lamp or a telephone swivel arm.

The overbed table is fixed securely to the cabinet body and can also be attached on the other side if required.

Homelike rounded corner profiles and a tilting overbed table are the special strengths of the Cosimo.

**Accessible from both sides**

### Cosimo Dimensions

- **Height**: 72 - 107 cm
- **Width**: 61 x 37 cm
- **Depth**: 53 cm
- **Weight**: 117 kg

Conturo
The robust one

Thanks to its **robust design** and great flexibility, the Conturo is strong enough to easily withstand all the demands of day-to-day care. It also offers residents many extra practical advantages: All drawers and the storage compartment can be used from both sides. If the bedside cabinet needs to be moved from one part of the room to another, its 360° castors make light work of any manoeuvring required. The Conturo is optionally available with a brake.

The manual height adjustment mechanism of the overbed table is also very robust and easy to operate. If the resident wishes to use the overbed table to read at or as a desk, the table can be tilted to a comfortable angle.

The Conturo can also be fitted at your request with a built-in fridge instead of the cupboard unit - this is ideal for keeping refreshments handy on a hot day.

**The colour of the mechanism matches the decor of the Conturo.**

**The overbed table increases the storage surface area.**

**The overbed table is fixed securely to the cabinet body and can also be attached on the other side if required.**

**Homelike rounded corner profiles and a tilting overbed table are the special strengths of the Cosimo.**
Estrado
The versatile one

The Estrado is a handsome and convenient bedside cabinet which has an additional space-saving design feature: In its retracted state, the overbed table is fully integrated into the body of the cabinet. This means that the top surface of the Estrado cabinet is increased, since it extends over everything, and offers plenty of useful space for placing items. The drawer, storage compartment and cupboard can be used from both sides which makes this cabinet highly flexible in everyday use.

The tilting overbed table can be used as a bookrest.

The overbed table of the Estrado is integrated into the cabinet body to save space.

The top surface of the Estrado cabinet is particularly spacious.

Alcamo
The cosy one

The Alcamo unites the comfortable versatility of the Estrado with a design that incorporates a homelike touch: Its top surface and corner profiles are rounded and so create a particularly homelike ambience. The voluminous cupboard, the storage compartment and the drawer of the 89 cm high bedside cabinet offer ample space so that the important things in everyday use are always close at hand – from both sides. The Alcamo’s overbed table can easily be infinitely adjusted to the desired height with the aid of power assistance.

The Alcamo can be accessed from both sides.

The height-adjustable overbed table is easy to tilt.

The top surface and corner profiles of the Alcamo are rounded for a homelike appearance.

The top surface and the Alcamo are rounded for a homelike appearance.
The compact construction and the homelike design of the Cosano make it a particularly reliable and flexible piece of furniture for every care room. In particular, it offers a great deal of space on its generously sized cabinet top and on the fold-away overbed table fitted at the side. The drawer, the open compartment and the cupboard can be conveniently used from both sides.

Extra optional features enhance the comfort factor of the Cosano even more. Instead of the cupboard, it is possible to fit a fridge, while the optional castors with brake boost the stability and steadiness of the cabinet.

The Lumano enhances comfort in the daily care routine with its particularly large top surface. It has an integrated slide-out table under the top surface which almost doubles the available space.

The interior of the Lumano also leaves nothing to be desired: The drawers glide on roller slides and are therefore particularly smooth-running and quiet. A simple release mechanism allows the drawers to be easily removed for thorough cleaning.

The Lumano is also available with an optional fold-down overbed table. It has a height-adjustable tabletop that can also be tilted. Changing the table column over from one side of the bedside cabinet to the other is quick and easy – with just one click of the foot pedal and no need to use tools. The fifth castor on the overbed table makes it resistant to tipping.
Compleo
The homelike one

The Compleo offers the same high level of comfort as the Lumano, but is distinguished by its different design. With its rounded corner profiles, it has a particularly comfortable feel and is ideal for making residents feel at home. The larger lower drawer, in particular, provides a generous amount of storage space. Since the front two of the four double castors are not steerable, the Compleo always has a firm stand and so serves the residents as a safe support.

Combino brevo
The compact all-rounder

The Combino brevo is particularly suitable in combination with low-height beds. The slide-out table is just below the cabinet’s table top. Rounded corners underline the homelike impression.

The back of the cabinet is fitted with a multifunctional rail as standard.

The large drawer offers plenty of storage space.

The slide-out table is just below the cabinet’s table top.

Rounded corners underline the homelike impression.

The Combino brevo is the smaller version of the Combino. But it still boasts the same comfort features. There is enough room for a large drawer with roller slides, another small drawer and the slide-out table that locks in place. Rounded corner profiles and a top surface with rounded edges provide a homelike touch and improve safety.

It goes without saying that the height-adjustable overbed table on the Combino brevo can also be attached on either side of the cabinet.
**Credo**
The smart one

The Credo, with its height of 56 cm, is also ideal for all low-height beds. In addition, this low bedside cabinet boasts a wealth of practical details.

The side panel conceals a bottle holder which can be attached on either side of the cabinet. This provides a secure hold for bottles and makes them easy to reach.

Glasses and bottles can also be placed safely on the bedside table, as this is surrounded on three sides by the raised wooden cabinet sides. This means that objects placed there are protected from falling off or being knocked over. The two large drawers running on roller slides round off the range of features, combining comfort with ample storage space.

**Cosano brevo**
The compact sturdy one

Today, low-height beds are an intelligent form of fall prevention in the care sector. The Cosano brevo is the ideal bedside cabinet for such beds. With its height of only 58 cm, it is always easy for residents to reach from a low-height bed.

The small bedside cabinet, however, leaves nothing to be desired where comfort is concerned. Its spacious cupboard unit and the drawer have room for all of those important personal belongings, and at the same time they are easy to clean. The clear lines of the Cosano brevo blend harmoniously with all kinds of furnishing styles. The bedside cabinet is therefore ideal for use in any surroundings.
Pleto
The stylish helper

No matter whether the resident is lying down, sitting up or standing - the Pleto server is always the perfect companion. With its large adjustment range from 69 to 104 cm, it easily adapts to every requirement. The table top of the server is available in two versions: As a one-piece horizontal surface it is ideal for mealtimes or for safe storage of items. The split version allows the larger section of the table top to be tilted for use as a comfortable writing desk.

All these features can also be enjoyed while the resident is lying down, as the C-shaped frame allows the table of the Pleto server to be positioned over the bed or chair. If the bed is raised by mistake, there is no risk of injury as a result: This is because the server is height adjustable even without using the release handle.

Thanks to its excellent manoeuvrability, the Pleto is extremely versatile in everyday care situations.

Quado
The mobile helper

The Quado is a server with many comfort characteristics. Its drawer and the two roomy compartments can be accessed from both sides and offer generous storage space for personal belongings. With its height-adjustable body and the fold-down overbed table in light grey, the server is ideal for meals taken in bed. Its good manoeuvrability and light-weight construction also make it suitable for use as a trolley, with which care staff can transport medicines and care utensils from room to room. Thanks to its large, smooth surfaces, the server is easy to clean and has excellent hygiene properties.

Several Quado units can be pushed into one another to save space when in storage.
Accessories
For everyday added comfort and support

Together with the bed, the bedside cabinet is the most important piece of furniture in a care room. To provide the most personalised and flexible solution possible, Stiegelmeyer offers a large selection of accessories with many different functions.

A built-in fridge is a safe place to store drinks and food on hot days. It can be incorporated easily in many models.

The crutch holder can be attached to the bedside cabinet with just the right spacing from the side wall. It adheres to the smooth surface by means of suction power with an eccentric locking mechanism. The self-adhesive mounting disc is supplied with the crutch holder.

The railing along the top surface of the cabinet is made of aluminium. It can be used to attach a practical towel holder or bottle holder. The bottle holder secures bottles and glasses in place on the top surface. The cabinet rail can also be fitted with a snap-on USB clip with an extension cable to the electrical socket for quickly recharging devices.

A waste bin with a lid and a capacity of around five litres can be simply hooked onto the cabinet’s multifunctional rail. The bin is made of plastic and so is easy to clean.

The document holder provides room for newspapers and books. The variable drawer inserts help to keep everything in order and prevent damage to the drawers. If the resident wants to keep personal valuables in the bedside cabinet, a lockable drawer is available for greater security.

Service

The Stieglmeyer-Group is your international partner for hospitals and care facilities and, with the Burmeier brand, also for caring in the home. We support our customers with practice-oriented products, solutions and services that we are constantly developing further.

- Founded in 1900 and still family managed
- Over 1,100 employees worldwide
- All core products manufactured in proprietary factories
- Product development and production in Germany
- Service, training and process optimisation at customer’s premises
- International certification and export to more than 60 countries
- Distribution companies located in Belgium, Finland, France, Netherlands, Poland and South Africa

Custodians of values
Our company was founded in Herford in 1900 and is still a family-run enterprise today. Respect and a sense of responsibility towards our customers, employees and partners form the basis for our day-to-day work. Based on these values and our many years of experience, we offer our customers all over the world high-quality products, solutions and services to meet the needs of the care and healthcare sectors.

Shapers of the future
In order to cope with rapid changes in the care and healthcare sectors, we develop all our products ourselves. Creating innovations and visions of what care will be like in future are the goals we pursue. We maintain regular contact with our customers in order to support them in their daily tasks. Implementing tomorrow’s trends today is a successful tradition of ours.
